The increase of competition, however, and the consequent reduction of the margin between the cost of producing yarn and its selling price, seemed, as time went on, to call for the aid of a more scientific and economical method, and the spinner who makes engagements for the supply of yarn to manufacturers may now, if he chooses, secure his cotton by buying futures, either for actual delivery to him at pin, ncash, re maturity, or as a hedge against a possible rise in price. The importer, whose agents in Texas, Georgia, or elsewhere The importerbuy cotton on his behalf for shipment to Europe, is enabled to secure a minimum selling price by the use of contracts for future delivery. The manipulation of such hedging contracts, in combination with the possession of actual cotton destined to be sold on the market so as to secure the greatest possible advantage, is, of course, an operation calling for much technical and commercial knowledge and skill. The ordinary speculator, who, forecasting to the best of his The Speculator, ability or information the probable extent of the coming crop and the demands upon it of extending or declining trade in manufactures, buys or sells futures with the intention of taking his profit without being interested in the actual cotton, is also, of course, a feature of the market. He has been known to plead the Gaming Act...
